 *in Games & Exercise*

Dear Customers,

When our 2020 Catalogue was compiled, we had no idea of what the near future would look like. Such severe cutbacks in the world of politics and society have seldom been experienced in recent years.

In times like this, let us consider our fellow human-beings, neighbours, friends and families, above all our children who need us most! It is up to us to set them a living example of fundamental values such as tolerance, esteem and respect. It is only by such concerted action that we will succeed in providing our little ones with a proper education, a sense of objectivity and social skills.

Courage, hope and strength evolve from confidence, positive thinking and genuine ideas or perspectives.

The 2021 Erzi Catalogue presents a wealth of new ideas for both children and adults.

We wish you good health, fortitude and happiness for the coming year as we all collectively engage in action together with our families and children for the benefit of all. Our sincere thanks go to all our customers for their continued loyalty and confidence. We share their pride and joy in pursuing resourceful aims in the effort to remain creative.

Best Wishes.

BEECH IS ...

... a natural beauty!

What's happened here? Have our carrots and apples really leaped out of the paint bucket? Or had the paint run out? – No, no, no! That was definitely not our intention!

Youngsters learn to respect their environment best by a hands-on approach. They identify the typical shape of fruits, vegetables and various pastries – with or without colour associations.

Our assortments are genuinely "organic", a fact that goes without saying, and consist entirely of natural materials.

COMPREHENSION ...

... the source of communication

The basis for acquiring **social and emotional skills** is formed during a child's first six years.

All infants are capable of expressing emotions from birth onwards. The ability to understand, to name and to distinguish emotions needs to be **actively** learned in early childhood.

The fundamentals of all interaction lie in the correct **interpretation of one another's emotions**. The Erzi range of play carpets caters for a whole miscellany of different moods and sentiments for exercising such communicative skills in a playful manner, promoting verbal expression, whilst sizing up, comprehending and articulating the feelings of others. This adds to the strength of **empathising with one's counterparts** along sustainable lines.

A game for all ages.

 This role-play is suitable for all ages. The ghosts appear in different, luminous colours with funny faces. When the ghosts are stacked, the game becomes suspenseful: Which ghost will make the stack fall?! If the Erzi Ghost Board is mounted vertically, the 30 ghosts in total can be stacked the highest.
 For concentration and strategy, children can achieve great success with this variant. If the stack falls, however, a stacking ghost remains standing only rarely. Due to different stacking heights, small and older children can play with the ghost board at the same time. The slim form makes it possible to integrate the ghost board into small playing areas as well. In the crosswise format, the ghost board is particularly suited for small children. Up to 5 children next to each other can play with the ghosts or build small ghost stacks. Here, the storage slots can also be used as grab handles. Arranging the ghosts in the storage slots is a good way to make cleaning up fun.

 material: beech, coloured laquered; birch plywood
 "The goal is the journey itself". This is a playful method for children to learn by dint of hard work how rewarding the whole game can really be when the goal is finally reached. Running water or rolling marbles proceed on a downward course. No matter whether used in summer or in winter, indoors or out in the sandpit, children will derive fun and pleasure from this product everywhere and at any time of the year. A closer look at the way the Marble Course works suffices to disclose its true potential. A small dam brings the marble to a halt, causing the water to overflow. Small holes at the sides are ideally suitable for inserting small sticks or flowers which serve to decorate the route while enhancing creativity. A hole can make the marble or the water disappear and set it in motion again at another level. A supplied plug (cork) serves to complement this feature.

... arithmetic & geometry!

Now simplified at long last!

To many people, mathematics is a fully abstract term, often quite hard to grasp without means of illustration. The educational game Fractions of a Whole not only conveys a visual impression of fractions, but also allows kiddies to gain hands-on experience!

**COMPARE
VOLUMES FOR
EASY UNDER-
STANDING**

INFO

The system comprises three principal components:

- Each part (whole, half, etc.) is designed as one self-contained solid unit instead of being made up of two pieces stuck together. This enables the formation to be visualized as a whole.
- All components are of the same colour (i.e. wood left in its natural state) so that they are easily recognizable as forming one single whole.
- Each piece is accorded its own space on the mat. If a cube needs to be formed from four quarters, the child removes each quarter from its mat and places it in the appropriate spot.

Educational Game Fractions of a Whole

length:..... 50,5 cm width:..... 7,5 cm
height:..... 14,5 cm Ø:..... -
weight:..... 736 g

content: 1 large cube – to form a whole, 2 halves, 4 quarters and 8 eights; 1 play mat (40x40cm)

material: beech, natural state; textile fleece

Constructed from solid beech, this unique system is designed to teach children aged three years upwards the various parts making up a whole number. While playing with the three-dimensional pieces i.e. cubes, kiddies learn to distinguish whole shapes and their individual constituents such as halves, quarters, eighths, etc. When advancing to higher primary school grades, they then learn how to express these shapes abstractly in the form of fractions.

This direct learning-by-playing method teaches youngsters the number of different possibilities of forming a cube, say from two halves, one half and four eighths, two quarters and one half, etc.

This educational game is highly recommendable for children with special needs.

Solids are 10 or 6 cm high and 6 cm wide/in diameter.

The children learn the basic geometric principles through play. They learn the meaning of shapes, size, bodies and surfaces, symmetry and harmony. Children attribute relevant properties to geometric bodies by touching them. Didactic value is upgraded with matching geometric faces on the play mats for better understanding of surfaces, edges and corners.

Rocky Rocker

length: 42 cm width: 28,5 cm
 height: 17 cm Ø:
 weight: 1,8 kg

material: birch plywood, laquered
 The Rocky Rocker is a game and sport product which can be used for young and old, as single product or as connecting point between two Erzi balancing boards. It corresponds to all current security standards and guidelines and offers nevertheless a design without any screws or nails. The Rocky Rocker is a natural product with love to the details and varied challenges to the exercise capacities of the children. The product can be used as stool and sitting or standing balancing seesaw. The seesaw demands from the user teamwork, balance, consideration, patience and coordination.

Rocky Rocker is a playing and sports device that can be used as a stool, a seat and a rock in either kneeling or standing position. In the sitting and kneeling position, the user may hold onto the rods. When placing an Erzi balancing board in the middle of Rocky rocker, it becomes a rocker for two children with numerous game variations (such as marble track). The rocker is great for walking (not running) over it. Placing a balancing board with one end on the Rocky Rocker and hooking this in forms a fixed ramp catering for a variety of different applications. In most cases, however, Rocky Rocker can be used as a connection of two Erzi balancing boards. The interaction of the connected boards requires and encourages coordination and concentration skills. In this variant, both Erzi balancing boards should be suspended by the appropriate rods.

Suspended on a trapezoid vaulting horse or wall bars (please note the drop height/protection), those equipments know no limits to the range of movements possible when using it for play or therapy.
