

Erzi®

MADE IN GERMANY

FIT & HEALTHY CATALOGUE 2019

Therapy equipment & appliances for health and fitness

We are expanding our sports and therapeutic assortment, top priority being accorded in all cases to aspects relating to safety, backed by professional support received from sport research advisors and therapists. Distinguished by the "Made in Germany" seal of quality, our premium products are innovative and conform to highest standards. A unique natural material, wood is known for its sustainability, apart from being pleasant to the touch. As such it is ideal for designing and creating sports and therapeutic appliances.

All products now await discovery on the following pages. They include the Erzi Woodroll and Trigger Series, the vast range of our OKTape Series: Kinesiological tape intended for universal use in the field of sports and therapy.

Enjoy browsing through our new collection.

Längenfeld (Tirol)

Woodrolls

a genuine Erzi quality product!

What's the purpose of Woodrolls or the reason for wood?

The Erzi Woodroll line enhances fascia training, raising it to a level hitherto unprecedented. Natural beech produces an incredible depth penetration effect on account of its hardness and inherent warmth. In addition, the anti-bacterial properties of natural wood products along with their weight make them ideal for performing soothing stroke-massage applications. Thus all requirements are equally catered for, regardless of whether the rolls are used by beginners or by professional athletes for revitalisation purposes, or as a means of preparing users about to take up some strenuous form of activity. Therapists will simply dote on the high quality standards enhanced by the pleasant feel of wood in its purest state.

Erzi Woodroller Balls literally round off any course of self-massage therapy. When exercising with these balls, you are really taken down to the roots and relieved of persistent muscular tension brought about by the inherent weight. Before use we recommend a pre-massage with the aid of the classical Woodroll (p.7).

1 Woodroller Ball

Ø: 8,0 cm
weight: 220 g
material: beech, waxed

47000

2 Woodroller Ball XL

Ø: 10,0 cm
weight: 400 g
material: beech, waxed

47001

To produce that intensive rounding-off effect, it is advisable to work with the Woodroller Ball at the end of a revitalisation session. It can be used on all parts of the body for removing tension as well as for loosening tackiness of the fascia connective tissue. Depending on the desired intensity, the Woodroller Ball is usable as a classical massager or (if applying one's own bodily weight) in a standing posture against a wall or in a reclining position down on the floor.

INFO

Depending on the desired intensity, the Woodroller Bone can be used in a standing posture against a wall or in a reclining position down on the floor.

The **Erzi Woodroller Bone** is specially designed for fascia-tissue training involving the back muscles. On account of its shape and the exceptional hardness of the wood, the lower muscles of the back can be reached with ease.

Also ideal for applying to the thighs and calves.

3 Woodroller Bone

length:..... 19,5 cm Ø: 8,0 cm
weight:..... 470 g
material: beech, waxed
distance pressure point: 11,5 cm

47005

4 Woodroller Bone, long

length:..... 22,0 cm Ø: 8,0 cm
weight:..... 820 g
material: beech, waxed
distance pressure point: 14,0 cm

47006

5 Woodroller Bone XL

length:..... 21,5 cm Ø: 10,0 cm
weight:..... 460 g
material: beech, waxed
distance pressure point: 11,5 cm

47007

6 Woodroller Bone XL, long

length:..... 24,0 cm Ø: 10,0 cm
weight:..... 780 g
material: beech, waxed
distance pressure point: 14,0 cm

47008

The **Erzi Woodroller Bone** is particularly effective in combatting backache. Its shape promotes activation and deep relaxation of the muscular system while affording protection to the spinal column.

Different widths enable the perfect depth penetration effect for different body sizes.

Fascia training

Classical and super intensive!

Working with the **Erzi Woodroller Rugby Ball** provides a unique form of fascia-tissue training. It facilitates reaching groups of muscles previously hard to get at. Its soft curves can be used for a soothing massage.

1 Woodroller Rugby Ball

47010

length:..... 20,0 cm Ø:..... 10,0 cm
weight:..... 610 g
material: beech, waxed

The exceptional shape of the Erzi Rugby Ball allows the user to reach those special muscles that run past the groin. This region is one of the major contributory causes of pain experienced in the regions of the groin and back. The posterior and chest muscles likewise benefit from the relaxation and invigorating effect produced by the Erzi Rugby Ball. The pointed taper facilitates deep and localised trigger-point massage as well as loosening tackiness of the fascia connective tissue.

The **Erzi Woodroller Cone** is ideal for performing a whole variety of different exercises aimed at producing an enhanced depth penetration effect. It serves to free the groin, chest and posterior muscles from strain and tension. In addition, the Woodroller Cone is a great tool for targeted trigger-point massage apart from being smooth to handle.

2 Woodroller Cone XL

47015

length:..... 15,0 cm Ø:..... 10,0 cm
weight:..... 580 g
material: beech, waxed

3 Woodroller Cone

47016

length:..... 10,5 cm Ø:..... 6,5 cm
weight:..... 200 g
material: beech, waxed

The hardness and weight plus the shape – similar to that of the Rugby Ball – all contribute to the efficiency of working with this natural beech product.

The **Woodroller Cone** is smooth to the touch and can be put to effective use for manual self-massage. Applying the shorter taper serves to ease obstinate muscular tension. Localised massage of the neck and shoulder muscles is also facilitated. It almost goes without saying that the Woodroller Cone is ideal for performing fascia-tissue exercises in a reclining posture down on the floor, particularly in the posterior and groin regions.

Woodrolls – For constructive activation and mobility workouts

These classical fascia rolls cater for enjoyable soothing massage applications as well as for constructive activation and mobility workouts. It is the use of natural beech incorporating inherent warmth along with stability and high quality that makes our fascia rolls so incomparable.

Nothing could be better for sports-event training, daily back-training exercises or just for sheer relaxation brought about by a thorough self-massage. The natural state of the material makes fascia training a very special experience indeed!

Erzi Fascia Woodrolls are the perfect thing for stimulating and relaxing the muscles before engaging in any strenuous activity or purely and simply for revitalisation. On account of their large-dimensioned bearing surface and the gentle pressure exerted, the rolls are ideal for users preparing for other Erzi Woodroll shapes producing a greater depth penetration effect.

4 Woodroll classic

length:..... 30,0 cm Ø:..... 14,5 cm
weight:..... 1,9 kg
material: beech, waxed

47020

5 Woodroll structure

length:..... 30,0 cm Ø:..... 14,5 cm
weight:..... 1,87 kg
material: beech, waxed

47021

INFO

The fascia rolls reveal outstanding quality features. The variety of different shapes serves to facilitate training and revitalisation applied to all groups of muscles.

Woodrolls Trigger

... Going deep down!

Beech wood is ideal for specifically targeted trigger-point and deep-tissue massage on account of its warmth and hardness. The soft and flowing properties of trigger point therapy exert full pressure on the tissue while protecting therapists from overstrain in exercising their occupation.

1 Woodroll Trigger Therapy

47080

length:..... 12 cm Ø:..... 4 cm
weight:..... 40 g
material: beech, laquered
big ending: Ø 40 mm | small ending: Ø 20 mm

2 Woodroll Trigger Point Tool, Set

47083

height:..... 11,5 cm Ø:..... 1,3 cm
weight:..... 13 g
content: 2 pieces | material: beech, laquered
big ending: Ø 13 mm | small ending: Ø 7 mm

3 Woodroll Trigger Set, nature

47081

height:..... 6 / 5 cm Ø:..... 6,3 / 5,3 cm
weight:..... 150 g
content: 2 pieces | material: beech, laquered

Anti-slip pad for vertical surfaces, e.g. walls or chair back-rests.

4 Woodroll Trigger Set, coloured

47082

height:..... 6 / 5 cm Ø:..... 6,3 / 5,3 cm
weight:..... 150 g
content: 2 pieces | material: beech, coloured laquered

The mini trigger-point massage is a "help to self-help" in resolving tension that builds up when faced with everyday situations, in the office, during travel or simply seated at home on the sofa. Areas of pain can be triggered while seated, standing or lying down.

Prolonged localised pressure can help relieve pain if applied regularly.

5 Ski Trainer

length: 119 cm width: 74 cm
 high: 21 cm Ø:
 weight: 19,8 kg
 content: ski trainer, 8 fixing pins
 material: birch plywood, laquered
 delivery: mounted

The **ski trainer** is something more than a mere balancing aid for ski enthusiasts. It combines the advantages of a slackline and balancing board for therapeutic and fitness applications. Regardless of skill or experience level, the versatility of this appliance knows no bounds.

Momentum

Therapy & training in perfect coordination!

47025

1 Muscle-trainer Momentum XL

length:..... 107,5 cm width:..... 25/26,7 cm
 height:..... 11,5/12,8 cm (measures without/with roll)
 weight:..... 5,24 kg

content: 1 baseboard, 2 handles, 2 treads, 1 semi-cone, 1 roll
 material: birch plywood, laquered, coloured laminated; no-slipping pad; silicone

A multifaceted functional-training and therapy device for exercising strength, balance and coordination applied to all groups of muscles.

The **Erzi Momentum XL** accesses you to potential training skills in a whole variety of different positions. These range from simple classical balancing exercises performed on one leg right through to targeted strength-training workouts involving the arms and legs, combined in each case with the back and abdomen muscles. Going for this unit means opting for variety, fun and highly effective training drills. The Erzi Momentum XL can be put to efficient use for both therapeutic and fitness functions. The use of interchangeable wooden inlays and balancing bases means that there is virtually no end to the potential opportunity for achieving maximum exercising results applying this versatile muscle-trainer.

magnetic mounts

1 Sling Trainer Orbi

length(rop): 63 cm width:..... -
 height:..... 3 cm Ø:..... 50 cm
 weight:..... 2,6 kg
 material: birch plywood, laquered; plastic; metal
 delivery: mounted

A complete gym incorporated in a single piece of equipment.

This is an indispensable piece of equipment for training all major muscle groups geared to a whole number of different exercises. No matter whether it's the legs, arms, abdomen or back that are in need of exercise, good trunk stability and body tension are fully catered for. The **Sling Trainer Orbi** has a significantly positive impact on training the lower abdominal region and muscles, thus serving to counteract muscular weakness and backache.

INFO

The **Orbi** is a resourceful training device accommodating the needs of up to two persons at a time with special emphasis on strengthening the muscular system of the abdomen and back.

▶ Stretching exercises

adjustable

Scapstick – the Shoulder Trainer

The Erzi Shoulder Trainer Scapstick is designed for exercising mobility of the shoulders.

It provides specifically targeted potential for expanding individual muscles, thus producing the desired therapeutic effect to counteract incorrect posture in the shoulder joints.

Movable handle mounts cater for a whole variety of different grip options and exercising motions, all conducive to shoulder mobility.

47040

2

2 Shoulder Trainer Scapstick

Erzi training boards are the perfect thing for exercising strength in the fingers, arms and upper body.

Combined classical grip and peg board features cater for countless grip and pull-up sequences. The two larger boards are fitted with metal eyelets. Here, attached band loops can be used purely and simply as footholds. This versatile combination makes our training boards ideally suited for the needs of both novices and aces.

47062

1 Trainings Board small

length:.....66 cm width:.....17 cm
 height:.....18 cm Ø:.....-
 weight:.....2,9 kg
 content: trainings board, 2 wooden grips (148 x Ø 30 mm)
 material: birch plywood
 delivery: mounted

The thrill and excitement unleashed by this version of the Erzi training board attains dynamic heights. Passing from one hollow or grip to the next is a playful way of developing strength and climbing skills.

47061

2 Trainings Board medium

length:.....66 cm width:.....17 cm
 height:.....32 cm Ø:.....-
 weight:.....5,1 kg
 content: trainings board incl. 2 metal eyelets, 2 wooden grips (148 x Ø 30 mm)
 material: birch plywood | delivery: mounted

Additional smaller strips and even more plug holes make this board a standard piece of equipment for ambitious power athletes and climbing enthusiasts. Simply mounted over a doorframe at home, dozens of different climbing techniques can be exercised daily as the user passes by.

47060

3 Trainings Board large

length:.....95 cm width:.....17 cm
 height:.....38 cm Ø:.....-
 weight:.....12,6 kg
 content: trainings board incl. 2 metal eyelets, 2 wooden grips (148 x Ø 30 mm)
 material: birch plywood | delivery: mounted

This is the very ultimate in training boards – no matter whether used for classical keep-fit or climbing techniques. A good selection of grips, hollows and slopes arranged with different depths, angles and planes provides immeasurable scope for obtaining mounting and climbing variety. This board also combines classical climbing grips with the hanging facilities provided by a pegboard.

INFO

Use of the Slackspot as a training and therapy device lends support to sensorimotor training functions, whilst also improving coordination and sense of balance.

low balancing height

46405

4 Slackspot Thera

length: 155,5 cm width: 18 cm
 height: 21 cm Ø:
 weight: 11 kg

content: 1 slackspot, mounting set, instructions

material: birch plywood, laquered

delivery: mounted

No toy! Sports good!

The **Slackspot** provides support for those performing balancing and coordination exercises for the first time as a means of gaining safe-walking confidence applied to everyday situations. The low balancing height caters for safe balance without assistance, no means of fall protection being necessary. The adjustable belt tension and stopper feet fitted to the underside are just two of the many features distinguishing this fine product. Slackspot needs no additional anchorage and is thus capable of being used in many different locations.

- delivery: mounted

Multi-talent

in the fields of sports and therapy

1

1 Maxi Roller Board

44443

length: 75 cm width: 37 cm
 height: 8,5 cm Ø: -
 weight: 3,86 kg
 material: birch plywood, waxed
 delivery: mounted

The **roller board** is stimulating exercise and coordination. The proprietary branded rollers consist of solid rubber with a slewing ring and double ball bearings. It is also possible to attach a towing rope to the front end.

2

2 Therapy Board Flex

46131

height: 8 cm Ø: 36 cm
 weight: 1,11 kg
 content: 1 balance board, 2 wobble elements
 material: birch plywood, laquered
 delivery: unassembled
 Registered Design.

This Wobble Disc is a veritable multi-talent. The exchangeable wobble components can be used for performing a whole different variety of exercises – twirling round or seesawing, on- or off-centre. Whatever the function, this sports and therapy unit poses a challenge one way or the other. The anti-slip and resilient material on the underside does not require any additional underlay. The balancing board comes in a coated finish and can be cleaned without any trouble at all.

scores of variations

The **Balancing Board Thera** is fun to play with and combines enjoyment with bodily exercise. Anti-slip treads act as a support to adults whilst they direct the balls along the track to the finish. The flexible anti-slip seesaw base fitted to the underside of the balancing board caters for appropriate safety. The integrated handle is useful for carrying the board when moving from one place to another.

LOAD CAPACITY UP TO 150 kg

INFO
Not every track can be made to direct the ball from the outer circle to the inner one and back again. This calls for careful balancing and coordination skills!

47045

3 Balancing Board Thera

length: 73 cm width: 47 cm
 height: 7,3 cm Ø: -
 weight: 4,79 kg
 content: 1 game board, 1 wooden ball
 material: birch plywood, laquered
 Warning! Not suitable for children under 36 months. Choking and suffocation hazard! Contains small parts and balls.

Figure of Eight. This is used primarily as a means for promoting concentration as well as for training hand motor skills and touch sensitivity. The interior ball guides impart an additional positive effect to motor exercising skills applied to the arm and shoulder regions. The two- and three-dimensional concept for this product is clearly illustrated in an exercise booklet supplied with the product. The two steel balls supplied with the product are always within grip as a result of the concealed magnetic ball mounts and can be integrated into this coordination-focused game, either individually or combined. An Erzi concentration game constructed of coated laminated birch.

45409

4 Lying of Eight

length: 51,5 cm width: 20,0 cm
 height: 1,8 cm Ø: -
 weight: 640 g
 content: 1 game board, 2 steel balls
 material: birch plywood, laquered
 Warning! Not suitable for children under 36 months. Choking hazard! Contains small balls.

4

magnetic ball mounts

Step-by-step the **SensoPath** product line guides the user through the world of sensory and motor functions. A balancing and wobbling act is the result, combined with a feeling of poise, a comparison of one's own physical abilities and a great deal more. One foot is deliberately placed in front of the other, stimulating a depth-sensory effect to weak feet. Resorting to a variety of different materials, surfaces and motor challenges serves to train bodily perceptions. All materials used are sweat- and saliva-proof, and are tested for toxics or harmful substances. **SensoPath** units are ideal foot trainers for games, sports and therapeutic applications.

6 pieces in a set

LOAD CAPACITY UP TO 140 kg

2

9 pieces in a set

44431

1 SensoPath Motility

length:..... 28 cm width:..... 14 cm
 height:..... 3,5 cm Ø:..... -
 weight:..... 1,6 kg

content: 6 seesaw-type foot mounts
 material: birch plywood, laquered

Size foot with rubber ball: 28 x 14 x 3,45 cm

Warning! Not suitable for children under 36 months. Strangulation hazard! Contains long string.

Setting foot on one of these **SensoPath** units involves the body in a constant process of alternation between body tension and balance. Similar to a therapeutic wobble board, these seesaw-type foot mounts exercise a positive effect on posture and coordination. The rubber ball under one of the foot mounts prevents slippage, even on smooth floors! Turning the ball upwards enables the **SensoPath** unit to be used for stretching and invigorating the transversal arch. Use is recommended with shoes, socks or barefoot.

44434

2 SensoPath XL

length:..... 140 cm width:..... 28 cm
 height:..... 2,26 cm Ø:..... -
 weight:..... 2,21 kg

content: 9 feet with different materials and surfaces

material: birch plywood, laquered; beech, coloured laquered; polypropylene; polyamide; aluminium; cork; no-slippering pad

Size highest foot: 28 x 14 x 2,26 cm

Warning! Not suitable for children under 36 months. Strangulation hazard! Contains long string.

Nine foot mounts revealing different materials and surface structures constitute the broad spectrum of this **SensoPath** product line. Constantly changing stimuli such as warmth and cold, hard and soft or smooth and rough are sensed and learned. Promotion of balance, sense of touch and tactile perceptions are the main issues involved in this keep-fit trail, the setup of which can be linear, circular or varied. Suitable for all age groups. Use is recommended without socks.

for big and small feet

Architecture

modules for demanding applications

The selection of different forms allows therapists to exercise several grades of difficulty in positioning the fingers, whilst the tricolour system facilitates naming the individual nuts. In contrast to a threaded rod, the screw provides patients with a better grip which in turn increases concentration on the hand involved in the movement. Simultaneous screwing of two or three nuts also presents a challenge to the development of motor skills.

The Erzi Architect Series addresses all age groups. Our building blocks are the answer to creative, success-bound amusement for all, including those with restricted motor skills. In simple step-by-step assembly instructions, famous buildings miraculously emerge – brick by brick! The enormous variety packed into each building-block set unleashes innovative potential for creating other buildings of the architect's own choice.

content: 1 screw, 3 nuts

material: beech, nature and coloured laquered

Kinesiological tapes

for sports and therapy

NEW

The form of tape owes its origin to the Japanese chiro-therapist Dr. Kenzo Kase. Without restricting freedom of movement, the tape with its elastic properties caters for a broad range of applications. Therapies most frequently encountered include muscle- and ligament-related techniques, corrective techniques as well as fascia and lymphatic techniques. Depending on individual requirements, muscular strain can be regulated, pain alleviated, pressure removed from ligaments, tendons and joints, misalignments corrected, fascial tension eased or lymphatic drainage promoted.

OKTape Classic Precut

material: beech, polypropylene

size single track: 43 x 7 x 3,5 cm

Warning! Not suitable for children under 36 months. Choking hazard! Contains small balls.

This set of sturdy wooden ball tracks will transform a group into a whole team! When joining forces, all players work hand-in-hand to assemble a long track. The aim is to keep the wooden balls rolling progressively from one point to the next. This calls for pronounced skill and the powers of concentration to react quickly. It also requires constant interaction on the part of the players to prevent the balls from falling on to the floor. Different levels of difficulty are also possible by reducing the tracks. Alternatively players can compete in two opposing teams.

7 Team Tower

length: 12 cm width: 24 cm
 height: 26 cm Ø:
 weight: 3310 g Size tower: 19 x 5,5 x 5,5 cm
 content: 6 wooden blocks, 1 frame with cord holder, 12 cords 2 x
 2m, 1 bag, 1 manual; material: beech, polypropylene

Warning! Not suitable for children under 36 months. Strangulation hazard! Contains long string.

This game can be played without much preparation by any number of children from 2 to 24. The Team Tower set caters for loads of fun both outdoors and indoors, while cultivating motor skills and coordination. Setting up and completing the tower is a team-minded and communicative activity. Describing actions and situations within the group serves to promote individual speech development combined with endurance in attaining the set target. Each member of the team experiences an increasing feeling of self-awareness and self-confidence in playing the game.

44602

1 Panto-Mimo, Blue big

length: 150 cm width: 100 cm
 weight: 500 g
 material: polyamide, elastane

Panto-Mimo provides ample opportunity. Handicapped or not, you can rely fully on your own senses when joining in the Panto-Mimo game. Panto-Mimo needs no particular instruction. Allowing you to play and move about at your own leisure encourages and challenges self-confidence, sense of balance, orientation skills, concentration and coordination. The large Panto-Mimo is a real challenge and engaged interaction with one another.

44220

2 Set of Singing Bowls

weight: 1,8 kg
 content: 3 singing bowls in various sizes (approx. Ø17cm/750g, Ø13/500g and Ø11cm/350g) and 3 different beaters (L: 15cm, 20cm, 30cm)
 material: brass

Singing bowls are used worldwide for meditation, music, relaxation, and personal well-being. When they are struck or rubbed the singing bowls produce sounds. The rubbing movements are made on the edge of the bowl with the help of a wooden beater. A penetrating sound is produced with a long and even rubbing movement either clockwise or counter clockwise. All 3 beaters can be used for striking on the side (top edge). Very deep or high sounds are made depending on the beater and the size of the singing bowl.

Safety

is our prime consideration

All Erzi products undergo consistent and regular testing along with official certification procedures. For double security: In addition to stringent in-house quality control measures, constant testing is carried out by external independent institutes and public bodies. This comprehensive quality management policy is documented by our seal of tested approval.
